

TECHNICAL DATA

- Total Dimensions: L1200 x W600 x H20mm
- Compression Strength: XPS 400kPa
- Pipe Centres: 150mm
- Suitable Pipe Size: 16mm
- Aluminium Foil Thickness: 200 Microns
- USP: Omega grooves for easy installation
- Suitable Floor Coverings: Laminate, Engineered Wood, and Chipboard, or levelling compounds (10mm) for other floor coverings.

20mm XPS FOILED BOARD

OVERVIEW

Introducing the exceptional versatility and performance of Komfort KOMFOIL Overlay Panels available in 20mm. These innovative panels are designed to accommodate various floor coverings, making them the ideal solution for floating floors, such as engineered wood and laminate. With two different installation methods for each flooring type, you can achieve the perfect underfloor heating system with ease.

KEY FEATURES

- High-density extruded polystyrene with an 200 micron aluminium sheet.
- Excellent impact and compressive strength.
- Can be easily cut using conventional tools.
