

TECHNICAL DATA

- Pipe Sizes: 16mm Pipe
- Pipe Centres: 150mm
- Wall thickness: 2mm
- Maximum Temperature: 90°C
- Oxygen Barrier: 5 Layer
- Warranty: 50 years warranty. 10 years guarantee against manufacturing defects.

PERT EVOH 5 LAYER PIPE

OVERVIEW

The Komfort Pert pipes are made from high-quality materials, together with the ultra-flexibility make it extremely easy to work with, with its construction being Polyethylene Raised Temperature Resistance (PE-RT) on the inner layer with polymer adhesive layer on to the EVOH layer (vinyl alcohol) this being the Oxygen barrier, followed by another polymer adhesive layer bonding the EVOH and outer protective PE-RT Layer. Our PERT EVOH and has a 5 layer oxygen barrier, unlike the inferior 3-layer pipes where the oxygen barrier is exposed, which can lead to corrosion and steam build up in the system.

KEY FEATURES

- No salts are deposited on the inner surface.
- Resistance to adverse conditions (high temperature, high pressure).
- Small thermal expansion.
- 100% oxygen barrier existence.
