

TECHNICAL DATA

- Power Supply: 230v, 50/60Hz
- Max Load: 16A Volt-free
- Set Point Range: 5~35°C
- Ambient: 5~50°C
- Relative Humidity: 85%
- Backlight: White
- Sensor: NTC 10KΩ at 25°C
- Accuracy: ±0.5 °C (step control by +0.5°C).
- Protection Class IP20
- Housing - ABS to UL94-5 fire retardant plastic.
- 3m Floor Sensor Included
- 2 Year Warranty

SMART THERMOSTAT

OVERVIEW

This intelligent, programmable room thermostat is designed for underfloor heating and cooling systems, compatible with conventional and condensing boilers as well as air and ground source heat pumps. It enables remote control and automation of your properties heating via a mobile app. The thermostat monitors the temperature, activating the heating when the temperature drops below the desired setting, and turning it off once the set temperature is achieved.

KEY FEATURES

- Smart WiFi Control - Remote Via Mobile.
- Big Touchscreen LCD Display.
- Heating and Cooling mode via CO Input.
- Adjustable Manual mode and PRG. Mode Control.
- 7 Days Programmable (4 Periods/Day).
- Humidity Display. Frost Protection.
- Open Window Detection. Child Lock.
- CE, RoHS, RED and 2 Year Warranty.
