

TECHNICAL DATA

- Max. flow: 3.8m³/h
- Max head: 7m
- Voltage/ Frequency: 220~240V 50HZ
- Pump housing: Cast iron
- Insulation class: F
- Degree of Protection: IP44
- Liquid temperature range: 2~+95°C
- Max System Pressure: 1 MPa
- Cast iron connections: 1" 1/2
- Power cable included.
- PWM Cable included.
- 3 Year Warranty.

A-MATIC UFH PUMP

OVERVIEW

Komfort A-MATIC 25/70 130mm Pump is designed specifically for underfloor heating. This variable frequency circulation pump controller system is designed for flexible, efficient operation, with support for both user interface control and external low-voltage PWM signal control. Using FOC (Field Oriented Control) technology, it can drive a three-phase DC brushless motor and automatically identify the required motor parameters, delivering accurate feedback on flux, flux angle, motor shaft speed and torque. It also features offline motor parameter identification, so no datasheet is required.

KEY FEATURES

- Up to 240m²
- Max. flow: 3.8m³/h
- Power Cable.
- PWM Cable Included.
- 3 Year Warranty.
